

I wish to inform that the MVC Library has obtained free trial access to CSA Illustrata: Natural Sciences, a web-based online database from PROQUEST, for a period of one month for the benefit of research scholars, faculty members and scientists of TANUVAS. The online database helps to search within and across a wide range of subject areas viz.,

- Agricultural
- Environmental
 - Animal husbandry
 - Medical sciences
- Biology
- Pharmacology
- Conservation
- Veterinary science, etc.

The database includes tables and figures from more than 1,000 journals from prominent publishers resulting in more than one million indexed images searchable. The other special features of the database are graphical objects are deeply indexed so users can locate relevant research with pinpoint accuracy. Each object is classified by one or more general categories. This allows researchers to learn about the actual data collected, observed, or modeled and quickly determine if it is relevant to their work.

CSA Illustrata can be accessed from the University Intranet as well as from the MVC Library network by [clicking here](#)

I request all the research scholars, faculty members and scientists of TANUVAS to make use of this opportunity. The free trial will be available up to 15.07.2008. Please send your feedback and comments to librarymvc@yahoo.com
